

GROUP:

- Users can create groups, with a group having only one owner.
- Each group accommodates users through a feed, where users can post and interact.
- Groups support assigning roles to members: admin, moderator, user, and custom roles for decoration.
- The admin role is held only by the group owner, who can manage users, posts, and group settings.
- Groups have a general feed with filtering options based on tags for customized viewing.
- Group settings include max posts per hour for an user, group icon, group banner, name, description, password, ability to make posts by default and visibility (private or public).

GROUP MEMBER:

- Members have three functional roles: admin, moderator, or user.
 - User:
 - Can create posts if enabled.
 - Can invite others if the group is public.
 - Admin:
 - All user powers.
 - Automatically assigned to the group owner.
 - Can modify roles, create new decorative ones.
 - Can remove, invite (regardless of group visibility), and ban users.
 - Can delete, hide, or pin posts.
 - Can ban, unban, timeout, or untimeout users.
 - Can assign right to create posts to users (if off by default).
 - Can modify group settings.
 - Create, approve, or reject invites.
 - Moderator:
 - All powers of an admin except:
 - deleting posts
 - banning users
 - demoting other moderators, admins
 - creating other moderators, admins
- Members can create posts within the group if given the right.
- Members can filter the group feed based on tags (user defined ones or automatic ones based on content), allowing customized viewing.

GROUP FEED:

- Feeds can be filtered based on tags (user-defined or automatic) for customized viewing.
- Feeds contain multiple posts.
- Posts can be pinned to the top of the feed by admins.

GROUP POST:

- Posts have user-defined or automatic tags based on content.
 - Ex: A post containing a video will have a `video` tag.

- Admins can pin posts to the top of the feed.

POLL:

- Polls are single or multiple-choice.
- Polls can have a time limit within which are active.
- The platform allows creating paid polls and restricting result visibility.
- It supports live and non-live polling formats for real-time or pre-scheduled interactions.
